

## Radiant Cove Heater RCG Series

# Inspired by Nature

Producing enveloping heat that is also clean, cost-effective, uniform, and constant, the RCG Series radiant cove heater is a safe and «green» heating solution that harnesses the benefits of radiant heating, a process that occurs naturally in nature and has long been under-utilized in the industry.

We have all tried to make the most of the sun's warm rays on days when it seems the thermometer won't budge. Even if the air temperature is the same in the shade, it always feels warmer in the sun. Our radiant cove heater mimics the natural warming effect found in nature. Now you can actually lower the thermostat and enjoy increased comfort at lower temperature settings, which saves you money.

# A warm and cozy interior, real savings

Installed high up on the walls, the RCG unit confers class and aesthetics to any decor.

By heating objects instead of the surrounding air, the system provides indirect heat that radiates from the unit and is absorbed by surrounding objects, warming the entire room.

Ambient air eventually becomes warm, but because comfort level is not dependent on air temperature, the thermostat can be lowered 3 to 5 degrees with no adverse effects.

This means our radiant cove heater delivers heat and comfort at lower temperatures, saving you at least 5% on your utility bill.

## Models

Watts	Product #	Weight		Length	
	240V	lb	kg	in.	mm
390	RCGU0390	6	2.7	34	864
600	RCGU0600	8	3.6	47	1194
750	RCGU0750	10	4.5	59	1499
900	RCGU0900	12	5.4	71	1803
1050	RCGU1050	13	5.9	83	2108
1200	RCGU1200	15	6.8	94	2388
1500	RCGU1500	18	8.2	113	2870

## Kitchen

Finally, an answer to your kitchen heating problems! RCG radiant cove heaters can be installed above doors and windows or near the ceiling, freeing up floor space for essential kitchen needs.

## Bedroom

Most of us prefer sleeping in cooler rooms—but waking up in cozy ones. And because RCG units are installed up high, there is no need to worry that bedding or clothing will come into contact with heat sources.

## Living Room

Now you can adorn your windows with full length drapes and put your furniture where you like with the RCG unit. You are free to create the comfortable welcoming atmosphere you have always dreamed of.

## Office

In the workplace, where return on investment is essential, an RCG radiant cove heater does the job—and more. They offer outstanding value for the price, thanks to their efficiency, economy, high performance, comfort, unobtrusive design, and attractive good looks. So when performance counts, opt for the choice that delivers well-being and comfort.

## Day Care Center

The RCG radiant cove heater is the perfect choice for this brightly colored world where exploration is the game of choice. It is high up on the wall, beyond the reach of little fingers, so toddlers can thrive in a safe, cozy environment. And RCG units don't create dust or stir up air currents; they simply produce and diffuse thermal energy—a big advantage in reducing allergenic pollutants and airborne microbes.

## Restaurant

Attractive RCG units lend a touch of class to restaurants because they are placed above sight lines and are discreet. And because they rely on the principle of radiant heating to warm objects, they provide a comfortable, all-enveloping warmth, appreciated by customers.

## Hospital

RCG units let each room be controlled individually based on patient needs, regardless of sunshine or heating costs.
